Dear Ira,

June 15, 2006

I would like you to know how happy I am with the machines I purchased from you almost a year ago for my full service car wash . Like you said, they have virtually eliminate the use of squirt bottles and have eliminate the need for a "Laundry Person" full time. The machines are simple to use with the pre-set programs for each type of towel. And the in-line heater in the one machine sure comes in handy for the window towels. The automatic injection works great and it is easy to adjust.

I am equally impressed with the support you provide in times of need. An electrical problem caused the machines to lose their memory one day and were un-usable you walked us through the re-programming after providing us with the necessary data from the manufacture. and continued to check in with me for the next couple days to be sure I was ok. It's hard to put a price on that kind of service. You can be sure when we build our next wash we will be using your machines again.

Sincerely,

Christopher D. Dwyer, owner
